

Ultronic S

HIGH SPEED HAND DRYER

PRODUCT-NO.: 231582

The Ultronic hand dryer is a high grade, electric high speed hand dryer, with a very short drying time. The Ultronic is characterised by its powerful, highly concentrated, fast air stream in excess of 300 km/h, which dries hands in less than 15 seconds. This high speed air stream "wipes" moisture from the surface of your hands. The Ultronic hand dryer achieves optimum values in energy efficiency. The reasons for this are a significantly shortened drying time, demand-dependent control by means of the infrared proximity sensor, the low connected load and a particularly small CO
