

WSH 20

WSH SENSOR TAPS

PRODUCT-NO.: 238909

The WSH contactless electronic sensor tap is operated solely via its motion sensor and is therefore suitable for use at heavily frequented washing stations. An economy controller and automatic switch-off with infrared sensor technology reduce water consumption and thus save energy. Equipped with hygiene flushing, which can be programmed as a 12 or 24-hour cycle, the sensor tap meets all standards of comfort and convenience.

The pressure-tested version of the WSH sensor tap is for use in sealed unvented (pressurised) small water heaters and instantaneous water heaters.

The main features

Sensor tap for sealed unvented (pressure-tested) instantaneous water heaters and pressure cylinders

Optimum hygiene thanks to contactless operation

Reduces water and energy consumption

Adjustable mixed water temperature (fixed setting possible)

Selectable hygiene flush (in a 12 h or 24 h cycle)

Extensive function settings for convenient operation

Fully automatic sensor adjustment

Battery powered

Type	WSH 20
Part no.	238909
Application	Basin
Type	sealed

Technical data

Type of installation	Single hole mixer tap
Connection	Connecting hoses
Outlet height	103 mm
Reach	103 mm
Power supply	Battery
