

WPM

CONTROL UNIT/ENERGY MANAGEMENT

PRODUCT-NO.: 234727

Targeted control – planned expansion. This product is a radical new control concept. The comprehensive functions of the standard module can be extended with an additional module and a remote control. All of these components can be conveniently connected to one another via the system bus. The heat pump manager is the central control unit of the system, its integral programming unit is able to regulate numerous functions, such as a cascade of two heat pumps or the control of one direct heating circuit and two heating circuits with mixer. Through module extension, a further four heat pumps and two further heating circuits with mixer can also be controlled. These heating circuits (five in total) can each be controlled by a remote control. The components combine functionality, extendibility and ease of installation. All the modules feature the attractive new design and have significantly improved connections for the electrical installation components.

The main features

Heat pump manager in designer wall mounted enclosure

Cooling control function

Screed drying program

Type	WPM
Part no.	234727

Technical data

Protection class	I
IP rating	IP21
Supply voltage	230 V
Width	310 mm
Height	400 mm
Depth	100 mm
