

HSBC 200 S (GB) Set

DHW CYLINDER

PRODUCT-NO.: 236917

With the HSBC 200 S integral cylinder, instead of having the DHW cylinder and buffer cylinder standing side by side, they are arranged in a single appliance, one above the other. This almost halves the footprint required, so installation is possible even where space is tight, leaving you with much more room than you expected.

Excellent solution for family homes. The HSBC, precisely matched to the utilisation of a heat pump, covers everything required in a family house when it comes to heat and domestic hot water. All that and in a convenient format, too!

The main features

Combi unit comprising a DHW cylinder and a buffer cylinder

Halves the installation space required for separate cylinders

Compact, reliable and energy saving for use in family homes

Perfectly matched components for use in conjunction with an air source heat pump for DHW and room heating
