

STH 415 C Plus

HEATING BUFFER CYLINDER

PRODUCT-NO.: 205370

The all-rounder for your heat pump

This buffer cylinder is the perfect complement to your heat pump. It stores and delivers pleasant heat to keep your family home nice and warm. If your heat pump is also designed for cooling operation, the cylinder also stores the water required for this.

In the upper section of the cylinder, it is possible to install an electric threaded immersion heater for electric reheating. A second connector allows the installation of a further electric threaded immersion heater for charging the buffer cylinder. This lets you increase self-consumption of electricity from your photovoltaic system, for example.

STH 210 C Plus

Product-No.: 205369

The main features

Buffer cylinder for different heat pumps

Can also be used for cooling

Highly effective thermal insulation

Connector for an electric threaded immersion heater in both the upper and lower third of the cylinder

Type	STH 210 C Plus	STH 415 C Plus
Part no.	205369	205370

Technical data

Energy efficiency class (A+ → F)	B	B
Standby energy consumption/24 h at 65 °C	1.163 kWh	1.719 kWh
Nominal capacity	207 l	415 l
Height	1510 mm	1700 mm
Height when tilted	1637 mm	1867 mm
